## Introduction

Pacific Oaks College (PO) is dedicated to providing quality services to their students. To assist in their continued efforts, PO tasked the Office of Institutional Research (OIR) with a web-based assessment of current students' satisfaction with the institution. The purpose of this assessment is to identify areas in which the Administration can improve student needs and create a higher level of student satisfaction. The results of this assessment will be used to inform improvements to PO.

## Methodology

The goal of OIR's Spring 2017 assessment is to provide the information necessary to inform future improvements. In order to do this, OIR surveyed the entire active student population within PO for the Spring 2017 semester using a web-based questionnaire that contained 100 survey items that were in the form of multiple choice questions, Likert scales, and open-ended questions.

Using a Custom Term Registration Analysis Report from CampusVue, OIR identified 1,209 students with an active status<sup>1</sup> at one of the four PO campuses: Pasadena, Online, Cohort, and Branch.<sup>2</sup> The Spring 2017 assessment includes responses from 372 PO students. In order to increase response rates, OIR contacted individuals using an introductory email on March 20, 2017, that included an individualized link to the survey. Individuals who had not responded to the survey seven days later (March 27, 2017) received a reminder email with an individualized link to the survey. A second, third, and a final reminder email were sent respectively, on April 3, 2017, April 10, 2017, and April 13, 2017. The total number of possible contacts attempted by OIR was five.

Contact information for each individual was provided by OIR. The survey was conducted March 20, 2017 to April 17, 2017. Of the 1,209 individuals included in the sample, OIR received responses from 372 students. The overall response rate for the survey is 30.7 percent with a margin of error of  $\pm 5.1$  percent.<sup>3</sup> For a breakdown of response rates by campus, please see Table 1.

---

<sup>1</sup> Active statuses are defined as individuals with one of the following SchoolStatus categories: Academic & FA Probation, Academic & FA Warning, Active, Pending Graduate, Pending Probation, Re-entry, Transfer to Other Campus).

<sup>2</sup> The Cohort campus contains respondents from the Claremont Cohort, Downey Cohort, East Los Angeles Cohort 1, East Los Angeles College Cohort, HLPUSD Cohort, Human Services Association Cohort, Los Angeles City College Cohort, North Hollywood Cohort, Options Head Start Cohort, San Diego Cohort, Santa Ana Cohort, Van Nuys Cohort, and VOA-North Hollywood Cohort. The Branch campus contains respondents from the Sacramento Instructional Site and San Jose Branch Campus.

<sup>3</sup> Response rate was calculated according to AAPOR guidelines. The margin of error was calculated using the following formula:  $\frac{Z_{\alpha/2}}{(2 \cdot \sqrt{n})}$  where  $Z_{\alpha/2} = 1.96$  and n is the number of respondents who completed the survey, 372.

## Sample

The corresponding table (Table 2) compares campus and demographic information of three groups: Spring 2017 Census (A) population, the 2017 unweighted assessment sample, and the 2017 weighted assessment sample. Ideally, an assessment sample is representative of the population or within the survey's margin of error  $\pm 5.1$  percent. However, the portion of respondents from the Branch campus is overrepresented (respectively, 10.0% compared to 16.4%) while respondents from the Cohort campus are underrepresented (respectively, 18.2% compared to 12.1%). Thus, researchers at OIR made the decision to apply post-stratification weights<sup>4</sup> to the survey data based on three criteria: a respondent's campus, gender, and race/ ethnicity.

The resulting weighted assessment sample is extremely representative of the PO population. The largest discrepancy between the PO student population and the weighted assessment sample is among respondents who identify with a race/ethnicity other than Black or African American, Latino(a)/ Hispanic, or White (a difference of 1.7 percentage points). This discrepancy is well within the survey's margin of error and is acceptable.

<sup>4</sup> Post-stratification weighting is one technique used to ensure that the sample more accurately reflects the characteristics of the population. This is done by adjusting the magnitude of respondents' responses based on characteristics of the population and sample. Please note that the post-stratification weights do not change the actual answers to survey items.

## Analysis

The survey included 100 survey items assessing attitudes concerning student satisfaction toward PO, academic factors including advising, student services, communication with the administration, etc. The majority of survey items were evaluated using a five-point Likert scale where respondents report their level of agreement, satisfaction, importance, preparedness, and/or interest with the provided statements.

Due to a low number of responses within some campuses, the subsequent sections in this report do not speak to any statistical findings. Rather, this assessment provides a descriptive narrative of 95 survey items from the 2017 Student Satisfaction Survey.<sup>7</sup>

<sup>5</sup> This category was created using the Department of Education’s guidelines where any individual who identifies as Latino(a)/ Hispanic is categorized by their ethnicity, regardless of their identified race. The exception to this is if an individual identifies as International. In this case, the individual’s race/ ethnicity would be International.

<sup>6</sup> Races and ethnicities included within the Other category are Asian, Pacific Islander, American Indian, Alaskan Native, International, Two or more races, and Not Reported.

<sup>7</sup> Open-ended survey items are not reported in this executive summary; however, they are provided in the topline found at the end of this document.

## General Evaluations

Respondents were asked to evaluate five survey items evaluating their experience at PO that includes the following topics: satisfaction with their overall academic experience, if they would recommend PO to friends/family, if PO has met their expectations, and if they are able to maintain a healthy balance between their personal life and course work/training. Survey items were evaluated on either a five-point Satisfaction scale<sup>8</sup> or a five-point Agreement scale<sup>9</sup> where larger values indicate higher levels of satisfaction or agreement.

Additionally, respondents were asked to evaluate the importance of ten survey items to their satisfaction with PO. Survey items were evaluated using a five-point Importance scale<sup>10</sup> where larger values indicate larger levels of importance.

**How satisfied are you with your overall academic experience at Pacific Oaks?** Respondents report satisfaction with their overall academic experience at Pacific Oaks. The average response among all respondents ranges from *Satisfied* to *Very Satisfied* (See Table 3; Institution:  $\bar{X} = 4.2$ ). ## Student Services & Resources

Respondents were asked a number of survey items related to their experience with student services and resources at PO. For example, respondents were asked their level of satisfaction with the communication and hours of operation of specific departments. Additionally, respondents were asked if they have used certain student services and resources offered at PO. Those who have used those services and resources were then asked to provide their level of agreement, satisfaction, or preparedness with various survey items. The majority of survey items were evaluated on a 5-point Satisfaction scale<sup>15</sup>, a 5-point Agreement scale<sup>16</sup>, or a 5-point Preparedness scale<sup>17</sup> where larger values indicate higher levels of interest.

**Now, we are interested in your satisfaction with the communication for several departments and organizations.**
